EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey Bacon on 15 April 2009.

The application has been amended as follows:

In the claims:

In claim 45, line 1, it appears that "32" was inadvertently deleted by the amendment of 05 March 2009. Accordingly --32-- has been inserted after "claim" in line 1.

In claim 57, "33" has been deleted and --32-- has been inserted therefor.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Applicant's amendments have overcome the previously applied rejections under 35 USC 112. The examiner's amendment was entered to correct minor problems with claim dependency. Upon further consideration of the applied prior art, the prior art rejections have also been withdrawn. In combination with the claimed limitations, no teaching or suggestion was found in the prior art of record to provide the limitation of a deformability of about 14-25%. In particular, the application of an 800 g weight with a

Art Unit: 1791

foot having a 10 mm diameter applies a pressure of about 15 psi. The reference to Allen (US 3801421) provides an example wherein a deformability at 15 psi is only about 10% (column 9, Table III). While 10% is not very far from 14%, 10% deformability is considered outside the claimed range. Furthermore, Allen achieves this deformability by pressing the mat assembly at a pressure of about 0.5 psi (75 lbs/ft²). See column 9, lines 1-4. This pressure is lower than the claimed range, and accordingly one would expect a deformability higher than the claimed range since Applicant has clearly demonstrated that lower pressure in the pressing and heating step results in higher deformability. In contrast with the claimed invention, Allen achieves relatively low deformability even when pressing at a pressure below the claimed range. For these reasons, the examiner agrees with Applicant's argument that the claimed deformability is not inherent in the modified method of Crenshaw applied in the previous office action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL A. TOLIN whose telephone number is (571)272-8633. The examiner can normally be reached on M-F 9am to 5:30pm.
